Fix Track over clamps

(R=roomside)

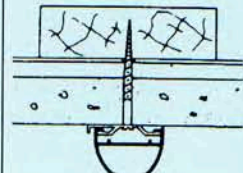

Rotate clamps counter-clockwise to lock track into place

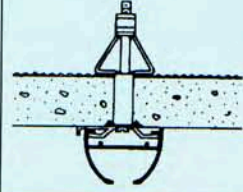

Mounting of connecting bridge #3802.

Ceiling mounted onto plaster and concrete

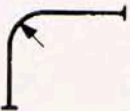

Ceiling mounted onto suspended ceiling using wooden blocking. (Into T-bars: Use self-tapping screws.)

Ceiling mounted onto plaster and metal lath

Product Information

- #6010 is a light weight, yet efficient ceiling mounted cubicle track
- Elegant, aesthetically pleasing look.
- Available with stainless steel hooks or nylon hooks for buttonhole drapes
- Unique break-away system allows separation of hooks from glider when draperies are pulled with excessive force, thus preventing damage to installation or injury to patients
- Since the track is mounted with unique, hidden swing clamps, the curtains glide easily and smoothly without being hindered by screw marks on the glider channel or by screw heads sticking out inside the track
- Due to its oval shape and smooth, light etched anodized surface the track is highly dust resistant
- Equipped with a concave, self-cleaning gliding channel, the track meets the highest hygienic health standards
- Available in standard clear anodized or optional white finish
- Available in lengths up to 730cm (24 feet) to allow for un-bridged installations of most configurations
- Particularly suitable for:
 - Hospitals, Nursing Homes
 - Psychiatric Hospitals
 - First Aid Rooms
 - Doctor's Pratices
 - Shower Curtains
- 5 Year Warranty

Can be curved to a minimum radius of 300mm (12")
